

## Re-Registering your copy of DataSlave

The DataSlave licence only permits DataSlave to be run on a single machine. When you activate your licence you lock the licence file to that machine. The licence file will not work on another machine. If you need to re-install DataSlave, re-build your machine or move DataSlave then please read the following notes:

### Re-installing DataSlave:

- Before uninstalling make sure you save your licence file to a safe location. This file is:  
C:\Program Files\Baycastle Software Ltd\DataSlave\*filename.lic*
- If you have purchased DataSlave Loader please make sure you also save the licence file for it.
- Uninstall and re-install DataSlave
- Copy the licence file(s) back to the DataSlave directory
- DataSlave will continue to run as before

### Re-building your machine

- First make sure you save your licence file(s) to a safe location
- Carry out the required maintenance. If the hardware is substantially changed the machine may be treated as a different. In this case please see the procedure, "Moving DataSlave to another location", below
- Install DataSlave
- Copy the licence file(s) back into the DataSlave directory
- The licence may need to be activated again, but after this DataSlave will continue to run as before

### Moving DataSlave to another location

- First make sure you save your licence(s) file to a safe location
- Contact Baycastle to inform us of your plan to move your copy of DataSlave. We may require faxed confirmation
- Uninstall DataSlave
- Install DataSlave on the new PC and copy the licence file(s) back to the DataSlave directory
- Run DataSlave. You will be asked to activate the licence.

## Re-Registering your copy of DataSlave

- Select activate by email and send [support@baycastle.co.uk](mailto:support@baycastle.co.uk) the Machine Key

- Baycastle will send you the unlock code.
- Once you have received this display the above dialog box by selecting Activate by email again and enter the code into the fields.
- Press Continue to complete the licence activation.
- Moving DataSlave is normally limited to 3 occasions in a calendar year and Baycastle may make an administrative charge
